

# Zaki Sadiq, DDS, FICOI

## • *General Dentistry*

Focused on providing comprehensive care by using cutting-edge techniques and remaining on the forefront of technology, Dr. Zaki Sadiq enjoys changing and improving both the smiles and lives of his patients.

He focuses on implant dentistry, particularly All-on-4® procedures, full-mouth reconstruction, and same-day implant therapy. “From a surgical aspect, we’re able to handle the most complex cases, and from the restorative aspect, we use one of the top labs that can deliver the most lifelike and beautiful cosmetic restorations,” he says. “We want to make sure patients receive the best possible treatment from start to finish.”

Dr. Sadiq is also proud of working successfully with many phobic patients by using moderate IV sedation. “We are able to accomplish all of our patient’s dental treatment under one roof with the comfort of IV sedation, bridging the divide for phobic patients in dire need of necessary dental treatment,” he says.

Dr. Sadiq has earned fellowship status from the International Congress of Oral Implantologists. To see some of his completed work, follow him on Instagram (@drzakisadiq).
